Profile

Software Developer with an interest in building practical, user-focused web and mobile applications. Through academic and personal projects, I have developed experience with full-stack development, machine learning, and database systems using technologies such as Django, React Native, Node.js, PostgreSQL, and Python. Motivated by continuous learning, I enjoy turning ideas into reliable software and expanding my skills through new challenges.

Education

BSc Polytechnic Institute of Bragança , Informatics Engineering Bragança, Portugal	2023 – 2026
Kathmandu Model Secondary School , High School Kathmandu, Nepal	2019 – 2021

Projects

QuizHub- Trivia Web Application *(In Progress)*

Django • HTML/CSS • JavaScript • PostgreSQL

- Independently developing a full-stack trivia platform featuring user authentication, interactive gameplay, and a responsive interface.
- Building custom frontend components and backend functionality using Django, with a focus on creating an engaging user experience.
- Continuously expanding features and refining the application beyond university coursework.

Water Sampler Management Application

React Native • TypeScript • Node.js • Express

- Collaborated in developing a cross-platform mobile application for recording and managing water samples.
- Developed REST API endpoints and integrated frontend and backend components to support sample logging and workflow tracking.
- Worked within a team to implement features, test functionality, and resolve application issues using Git.

Inventory Management System

Django • PostgreSQL • Git

- Developed a full-stack web application to manage inventory, products, stock levels, and billing records.
- Implemented CRUD functionality and designed a relational database to support efficient inventory management.
- Used Git for version control throughout the development process, managing updates across models, views, and templates.

Netflix Stock Price Prediction

Python • Pandas • NumPy • Scikit-learn

- Developed machine learning models to predict Netflix stock prices using historical market data.
- Processed and analyzed datasets through data preprocessing, feature engineering, and exploratory analysis.
- Compared multiple regression models and evaluated prediction performance using standard machine learning metrics.

CERTIFICATIONS & ACTIVITIES

- Data Analytics Job Simulation - Deloitte
- Introduction to Networks - Cisco Networking Academy
- Introduction to Cybersecurity - Cisco Networking Academy
- MathE Project - contributed to the testing activities for an EU-backed academic mathematics platform.

SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

Frameworks & Tools: Django, Node.js, Express, React Native, Git, Docker

Data & Analytics: Pandas, NumPy, Matplotlib, Scikit-learn

Databases: PostgreSQL, MongoDB

Languages: English (Fluent), Portuguese (Intermediate), Nepali (Native), Hindi (Fluent)
